

## BIN LIFT DEVICE TYPE 10/20 RM

Your plus in flexibility and comfort

### Options

- Design for special metal containers
- Screw mounted comb for 120 l and 240 l large waste bins
- Hydraulic lifting comb for lifting weights over 40 kg
- Stainless steel chute, e.g. for acidic or aggressive material

### Your advantages:

- ✓ Can be used on our ring machine Rm 10 and Rm 20 as well as on our wet waste compactor Rm 20N.
- ✓ Fast adaption possible on site, mobile and stationary design
- ✓ Emptying large waste bins with flat and round lid (optional) in the bin sizes 660 l, 770 l and 1,100 l
- ✓ Power supply of the bin lift 10/20 Rm and the machine via one electrical socket
- ✓ A steel border on the chute prevents contamination on site

### Technical data

	Attachable bin lift device
Machine length	1250 mm
Machine width	2155 mm
Machine height	2283 mm
Motor rating	2,2 kW
Oil quantity	25 l
Lifting force up to	500 kg

## BIN LIFT DEVICES

### Individual planning and production

#### ■ Integrated bin lift device

#### Your advantages:

- ✓ Easy lifting and emptying
- ✓ Custom-made products
- ✓ Innumerable applications
- ✓ Solid construction

#### ■ Attachable bin lift device

### Go for flexibility

You will get your bin lift device optionally...

- ... integrated into a waste compactor or attachable to existing waste disposal systems
- ... with centrally hinged comb lift device for additional lifting and lowering of 120 l and 240 l bins
- ... with mechanical lid opener for large waste bins with round cover
- ... with safety guard as access protection

#### Technical data

	Attachable bin lift device
Machine length	1670 mm
Machine width	2155 mm
Machine height	2284 mm
Motor rating	2.2 kW
Oil quantity	25 l
Lifting force up to	500 kg
