

Vertical balers

B-series

Baler B30

Extra wide and easy to fill

B30 is a wide baler. It is very easy to fill with larger boxes and other bulky waste.

Simple operation

A small light on the front flashes when a bale is ready. This reduces the risk of overfilling the chamber. The bale is ejected automatically by pressing two buttons simultaneously.

Highlights

- Wide opening and large chamber
- Retainers prevent compacted material from expanding
- Strap roles in the front means no going behind the machine
- Bale straps are easily cut with the mounted knife
- Full chamber indicator

Optional Extras

Gain remote control of your baler with our intelligent fleet monitoring system, BRA-IN.

A vertical door gives you unobstructed loading from both sides.

Balers are available in other RAL colours which you may choose.
